

Important Notice to our Customers

Product Change Notice # BE151116

Date: November 16, 2015

Re: Header and Mating Connector change on PFC MegaPAC, 4 kW MegaPAC, and Mini MegaPAC Families

To Our Valued Customers:

We appreciate your use of the PFC MegaPAC, 4 kW MegaPAC, and Mini MegaPAC product families. The purpose of this notice is to inform you of a change to the headers and associated mating connectors.

PCN Type:

Notice of product change due to header/connector obsolescence by our supplier

Product(s) Affected:

The headers and mating connectors for the following products will be changed as of April 1, 2016.

PFC MegaPAC
PFC MegaPAC-EL
PFC MegaPAC-HPEL
PFC MegaPAC-HP
4kW MegaPAC
Mini MegaPAC

All models shipped from April 1, 2016 forward will have the newer headers. The mating connectors for models shipped after this date will require a new connector kit (43075) which replaces connector kit (19-130040). There may be some situations where it will be necessary to transition to the new headers on the power supply prior to April 1, 2016. In these situations, Vicor will supply the new mating connector with the power supply.

Customer Impact:

Customer shipments after April 1, 2016 will receive the updated power supplies and the newer connector kits (43075) will need to be ordered if required. The mating connectors in the 43075 accessory connector kit are not a direct substitution for field replacement.
